Work Experience

Adamas Tech Consulting / Product Designer

JUL 2022 – PRESENT, BENGALURU

Designing across multiple B2B SaaS products end to end — research, user flows, UI, and engineer-ready prototypes — in close partnership with PMs and developers.

RICE Smart · B2C EdTech

1L+ ACTIVE USERS

Onboarding: Audited the onboarding flow and removed friction points surfaced through user research and competitor analysis, lifting sign-up completion by 4%.

Doubt-solving bot: Designed an in-app chatbot for students to clear doubts privately — addressing the hesitation many felt asking questions in live online sessions.

Arivoo · B2B education product suite

SMS · UMS · LMS

SMS — School Management (5 clients): Designed teacher and parent apps plus a multi-role transportation module (parent, admin, bus staff) — spanning attendance (later AI-based), lesson plans, homework, reports, fee payment, bus tracking, results, and analytics.

UMS — University Management: Designed applicant and student portals for 6 clients and streamlined the multi-step application flow, reducing application drop-off by 6%.

LMS — Learning Management: Designed mentorship and online-project modules, on-the-go quiz creation for teachers, and the student app.

NABC · North American Bengali Conference

4.5★ · IOS + ANDROID

Designed an end-to-end event management app (iOS & Android) for attendees to navigate schedules, sessions, and venue information.

Shipped to the App Store and Play Store, reaching a 4.5★ rating and ~12-minute average session length.

IISc · internal campus app

5 PLATFORMS → 1 APP

Unified five separate platforms into one multi-role app for students, faculty, and admin — covering online fee payment, on-campus service requests (health, maintenance), and institution management.

Led the UI design across every user role, building a cohesive visual system with role-specific screens.

upGrad Campus / UX Designer

JAN 2022 – APR 2022, BENGALURU

ODIN: Designed an internal tool for the sales team to manage and track applications and issue offer letters on the fly during calls.

Owned the end-to-end UX — user research, wireframes, and prototypes — partnering with engineering to ship it.

Education

NIFT / B.Design

MAR 2018 – MAR 2022, PATNA · CGPA 8.4/10

Coursework in usability engineering, tangible & interaction design, physical computing, design methodology, ergonomics, and systems approach to design.

Skills

Design: Design thinking • User flows • Information architecture • Wireframing • Sketching • Storyboarding • Motion design (After Effects) • Micro-interactions

Prototyping: Rapid prototyping with Keynote & InVision • High-fidelity prototyping with Principle & Flinto

Research: Usability testing • Heuristic evaluation • A/B testing • Intercept studies • Task analysis • Secondary & competitive analysis

Software: Figma • Sketch • Photoshop • Illustrator • After Effects • Premiere Pro • Unity • Blender
